# Knowledge and Visual Analytics (608)

Project Proposal by Chirag Vithalani

Professor: Josh Laurito | **Date:** 15-Nov-2016 | **Team Size** : 1

Overview & Purpose

The purpose is to analyze data of "ease of doing business ranking" data using R markdown and plot.ly.

Objectives

1. Observe countries ranking changed over time.
2. Right now across global map which countries/regions are better to do business .
3. Which countries have made remarkable improvements.

Motivation

I am from India and we have been tracking this ranking very closely. Despite making revolutionary changes; India's ranking hasn't improved significantly. This study will not answer this question but this is how I got interested in this data.
